

Before and after, preservation of the historic façade.

Façade in significant disrepair, vacant for 40 years.

Masonry clay units and limestone restoration.

Now complete the King Edward Hotel

PROJECT NAME:

King Edward Hotel - Circa 1923
Heritage Consulting, Historic Masonry Façade
Jackson, Mississippi

PROJECT DETAILS

12 Storey Beaux-Arts early steel and concrete frame with mass masonry and limestone façade. This National Registered Historic Building vacant and in disrepair for almost 40 years prior to a \$90 million renovation

SCOPE OF SERVICES:

BioPure Consulting was retained by the developer to assist the Architect in the historic renovation of the façade.

Subsequently BioPure developed for approval by the Department of the Interior Heritage Preservation Services, a scope of work and associated details/specifications for successful preservation of the façade.

During the renovation BioPure provided oversight of the masonry restoration and the various trades and conducted water intrusion testing to verify the envelopes performance.

For more information on the service and other, please visit www.biopure-consulting.com or call 404-451-1577 to schedule a consultation.

Water intrusion testing of the façade.
